

Micro-Function Sample Language Progression: Justify

(These will appear as hyperlinks from the micro-function column of the Collaboration Tool.)

Please note: "Students may demonstrate a range of abilities within and across each ELP level; second language acquisition does not necessarily occur in a linear fashion within or across proficiency levels. Differences in abilities within ELP levels are based upon ELLs' native language proficiency, their academic background in their first language, and their individual differences. For the purposes of presentation and understanding, the Levels 1–5 descriptors describe proficiency at the end of each ELP level in terms of a linear progression across the proficiency levels of an aligned set of knowledge, skills, and abilities. At any given point along their trajectories of English learning, ELLs may exhibit some abilities (e.g., speaking skills) at a higher proficiency level while exhibiting other abilities (e.g., writing skills) at a lower proficiency level. Additionally, a student may successfully perform a particular task at a lower proficiency level but need review at the next highest proficiency level when presented with a new or more complex type of task. Since, by definition, ELL status is a temporary status, an ELP level does not categorize a student (e.g., 'a Level 1 student'), but, rather, identifies what a student knows and can do at a particular stage of ELP (e.g., 'a student at Level 1' or 'a student whose listening performance is at Level 1')" (Shafer-Willner 2013: <https://wested.app.box.com/ELPStandardsResources/1/1238544451>)
