welcome

Beijing International Art Biennale, 2017
The Four Seasons/Xu Xuemei (China)/2011

the four seasons

starting with the person in the left most front of the room

- “count” off by season beginning with Spring
- find your season poster and stand by it
- introduce yourself to the people in your season and share what you hope to learn today
- remember who is in your seasonal group
- wait for further directions

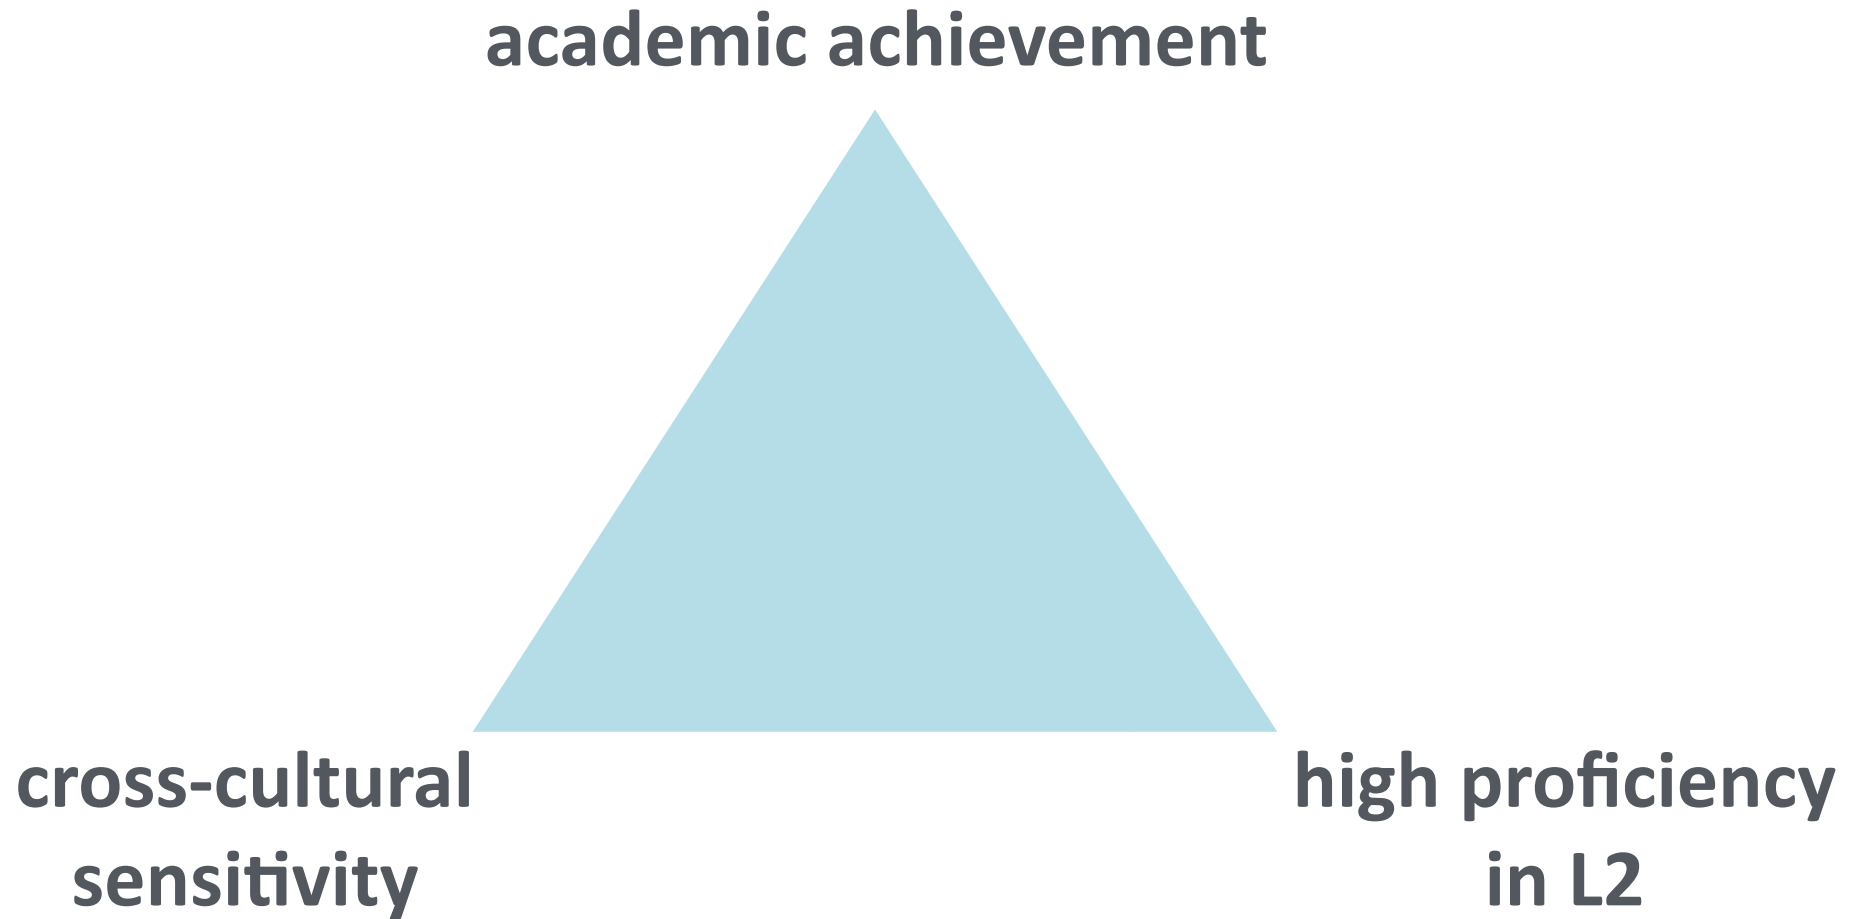

the four seasons

continued

- identify one person in your seasonal group as the “presenter”
- spring presenter and group walk to fall and take turns having the presenters introduce their group members
- summer walk to winter groups do the same
- repeat the process with spring to summer and winter to fall
- take your seats

threefold goal of dual language immersion

learning targets

- explore how values and beliefs shape our practice through two of the add.a.lingua quality quadrants
- identify and explain elements of instructional framework development within a balanced literacy context
- highlight language specific elements necessary for Mandarin Chinese literacy development and accompanying instructional tools

working agreements

- listen respectfully to one another without interrupting
- speak with intention to support group learning
- ask clarifying questions to ensure understanding
- stay present in the moment
- use technology for learning purposes only

learning strategies or protocols...why?

- **adult brain capacity for attention**

(<http://www.learningsolutionsmag.com/articles/1354/brain-science-the-neuroscience-of-teaching-and-learning>)

- **output hypothesis (Swain, 1985)**

survey says...

- listen to each statement as it is read and then move to the seasons as follows:
 - spring = strongly agree
 - summer = agree
 - fall = disagree
 - winter = strongly disagree
- take one minute between each statement to explain to the people in your group why you are there

survey says...

- students can become fully bilingual through dual language immersion education
- the primary responsibility of an immersion teacher is to teach content
- the primary responsibility of an immersion teacher is to teach language
- it is necessary to use the non-immersion language (English in the U.S. when students don't understand complex concepts, especially because Chinese is so difficult.)

parking lot

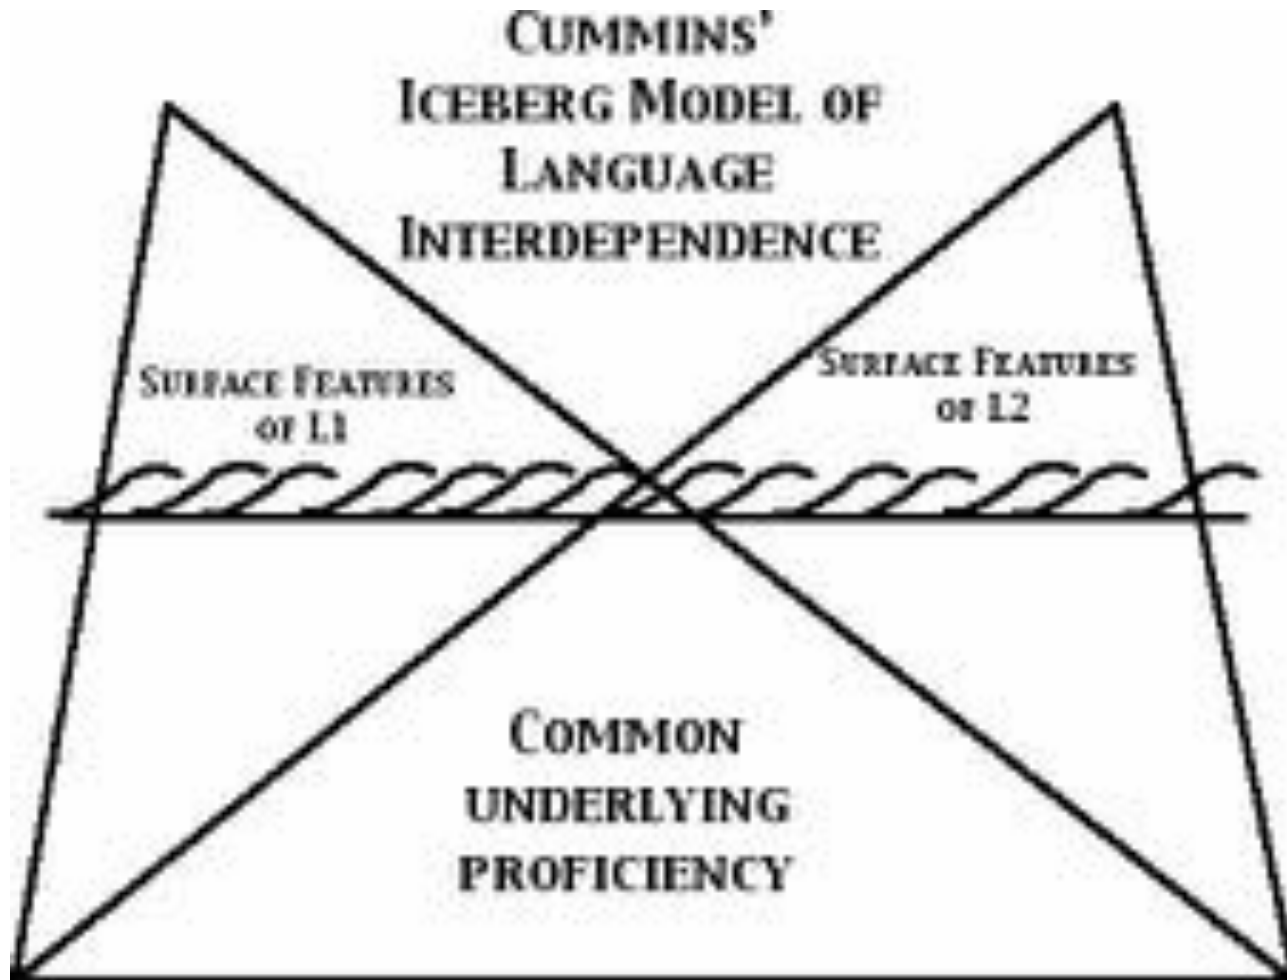

expressway in Beijing as people return from holiday, October 6, 2015

underpinning theories informing development

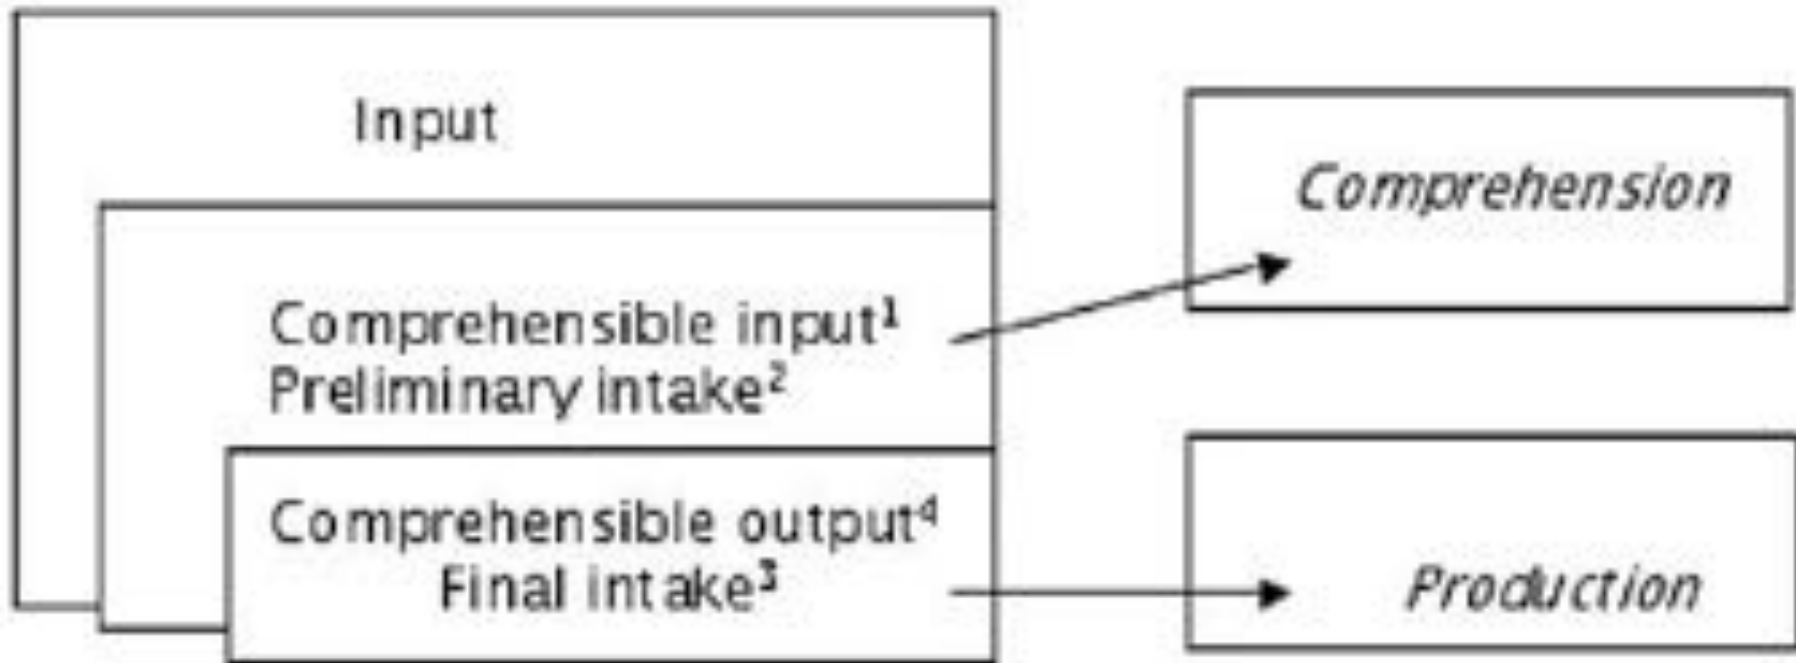

- **developmental interdependence hypothesis** (Cummins, 1979, 1981)
- **output hypothesis** (Swain, 1985)
- **weak interface position & the structural scope & sequence** (Ellis, 1993)
- **instructional counterbalance** (Lyster, 2007)
- **balanced literacy approach**

add.a.lingua quality quadrants

MYTHS

FACTS

read to self and check in

- read silently to yourselves the proficiency page and build success indicators with research one paragraph or section at a time
- pause after each and make eye contact with group members when finished
- check for common understanding and fill in key terms “matchbox definitions” during each “check-in” (8th page into packet)
- appoint one person to record outstanding questions on a sticky and place in the “parking lot”

spend-a-buck

- If you had \$1.00 and could spend every cent on the success indicators in the immersion language development quadrant, how would you divide your money based on **current needs in your program?**
- Where would you spend the most?
- Where would you spend the least?
- jot down responses on a stick and share with your table group

myth busters

- find a partner from an opposite season
- take turns turns reading the myth busters research aloud
- circle the one that most surprised you or affirmed your thinking
- tell your partner “why”
- wait for facilitator to ask for share out

jigsaw:

(aal immersion language only policy and timeline)

- locate one person from each season (groups of four)
- number off one to four
- read the section of the aal immersion language only policy and timeline that corresponds to your number (from subheading to subheading)
- take one minute to summarize and write down the key point of your section to share with the rest of the group
- take turns “teaching” your group members the one minute summaries

elevate the status & incentivize immersion language use brainstorm

signage

student work displayed

announcements

community involvement

piechart of a day

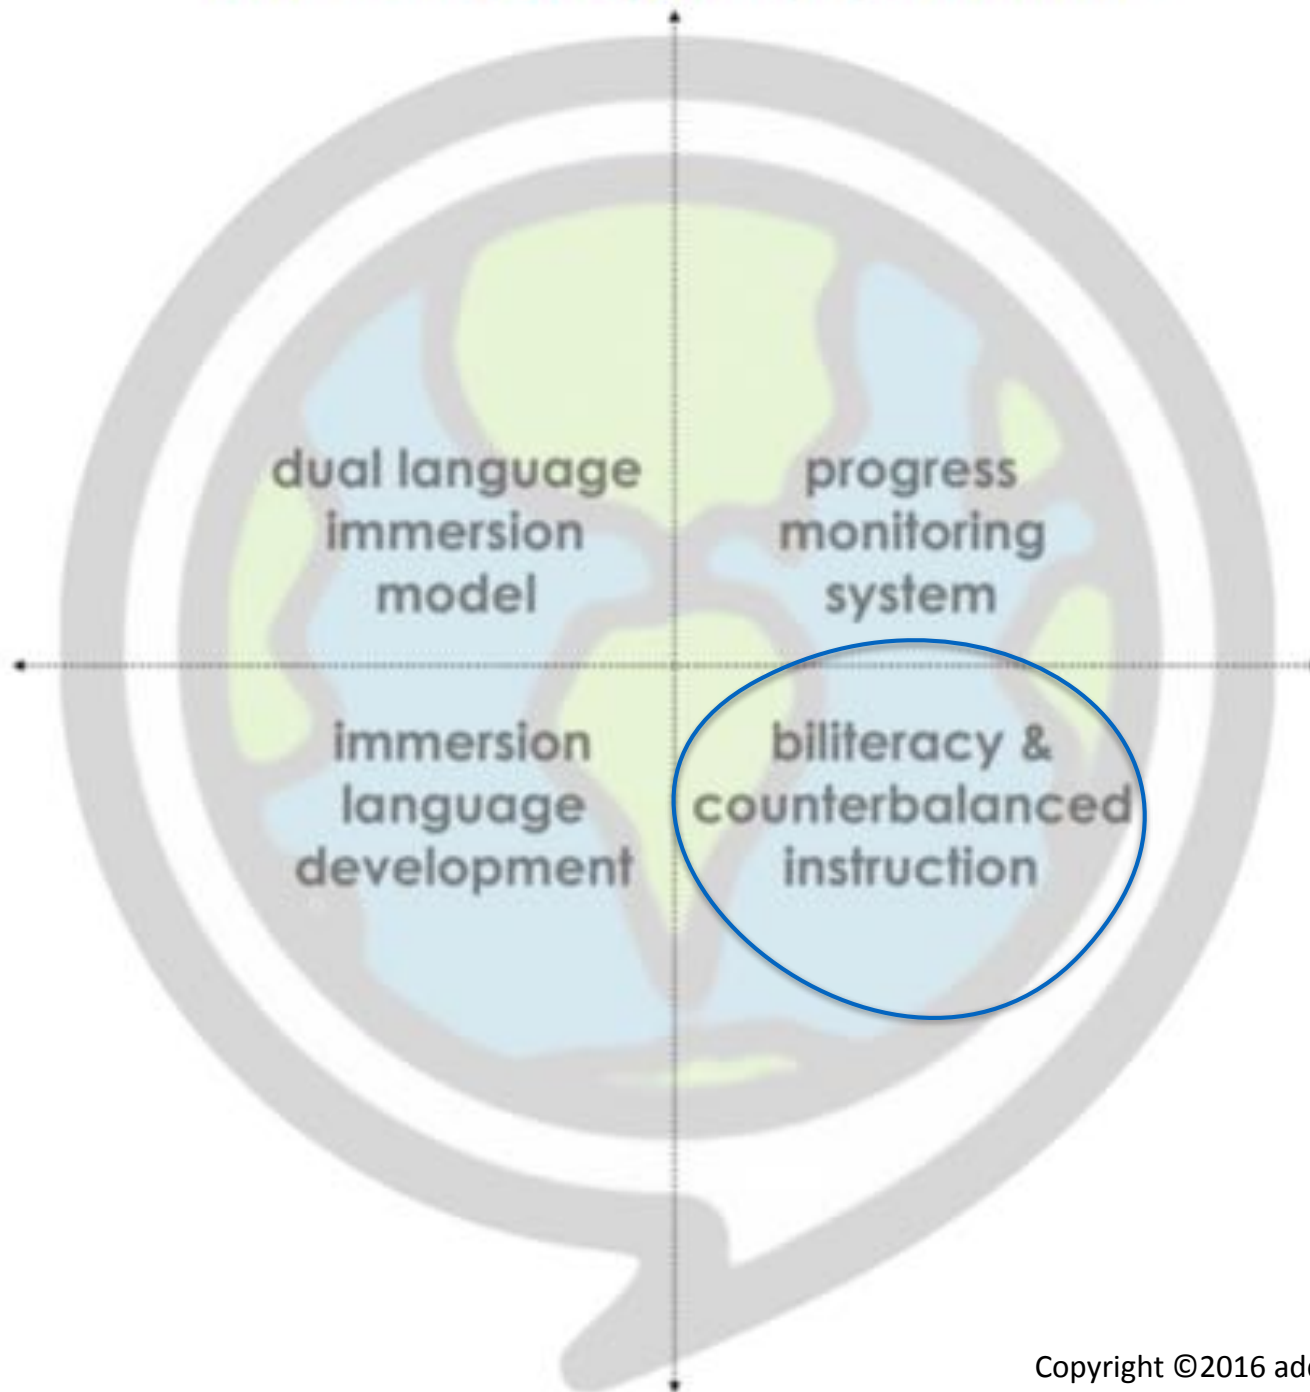

incentive plans

explanation - why?

classroom contract

circumlocution lesson - collective negotiation of meaning

add.a.lingua quality quadrants

say something

- connect with someone from a different season to form a pair
- identify partner “a” and “b” within your pair
- “a” and “b” read the first success indicator with research silently
- “a” then say something (“b” doesn’t respond)
- “a” and “b” read the second success indicator with research silently
- “b” then says something (“a” doesn’t respond)
- continue this pattern throughout - fill in “matchbox definitions” as you go
- record outstanding questions

biliteracy and counterbalanced instruction

Which elements are unique to the immersion language?

How do I address them through a balanced literacy approach?

Relationships and Convergences

Found in:

1. CCSS for Mathematics (practices)
- 2a. CCSS for ELA & Literacy (student capacity)
- 2b. ELPD Framework (ELA “practices”)
3. NGSS (science and engineering practices)

Notes:

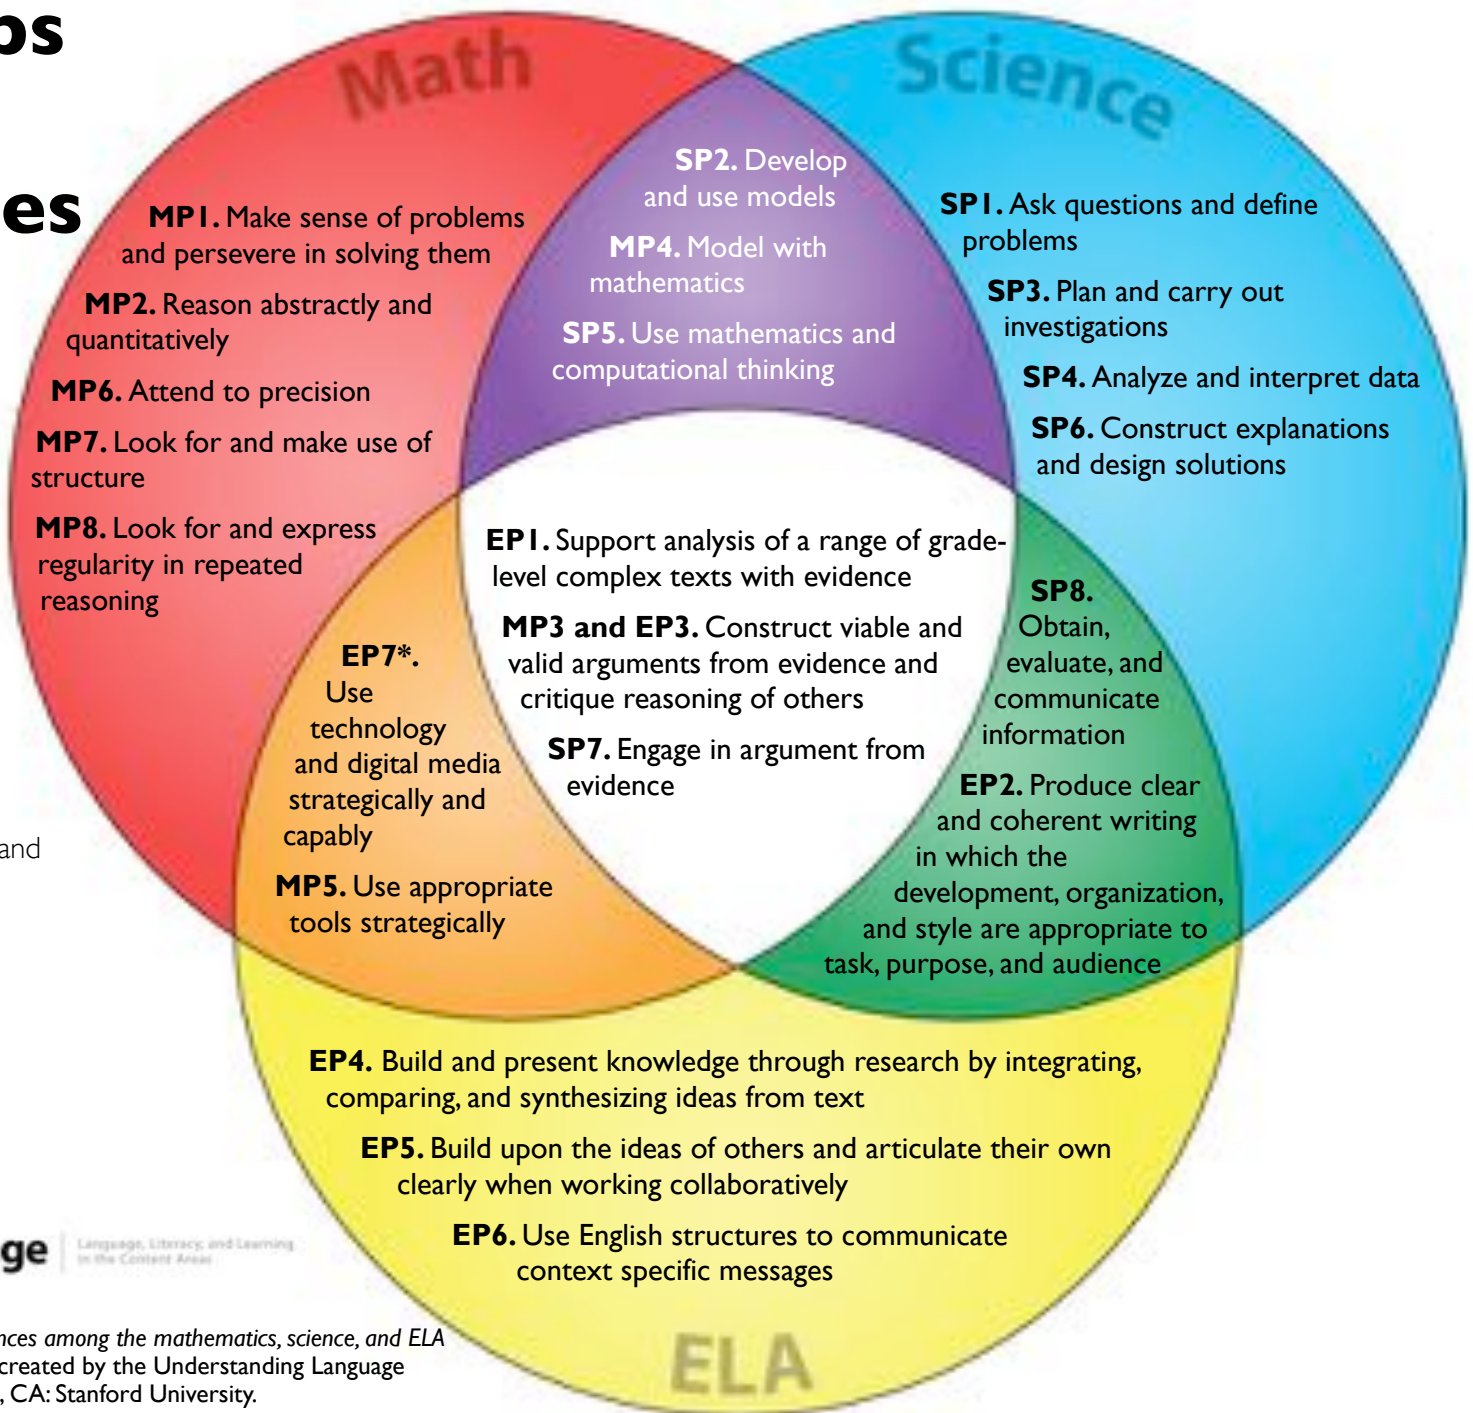

1. MPI–MP8 represent CCSS Mathematical Practices (p. 6–8).
2. SPI–SP8 represent NGSS Science and Engineering Practices.
3. EPI–EP6 represent CCSS for ELA “Practices” as defined by the ELPD Framework (p. 11).
4. EP7* represents CCSS for ELA student “capacity” (p. 7).

Understanding Language Language, Literacy, and Learning in the Content Areas

integrating Chinese specific linguistic features within a balanced literacy context - word features - phonological awareness (k-1)

Instructions for “listen, say, move and learn” routine

It is important to build phonological awareness when introducing any new words in Mandarin during kindergarten and first grade. Within the add.a.lingua instructional cycle, there are two key areas that allow you to establish a routine for introducing vocabulary associated with mentor text and word feature poem called “listen, say, move and learn”:

- introducing mentor text, example forms, and grammar and writing guide vocabulary
- introducing the word feature poems

teaching the “listen, say, move and learn” routine with tones

- hold up your index finger and show the first tone/character card to students while saying it (note: use correct numerical finger counts to demonstrate tones 2, 3, and 4)
- display the card on the whiteboard or other wall (with poster putty) and point to the direction marker (—) while voicing the tone aloud
- point to the character again and say the tone while making the corresponding gesture
- have students stand and repeat saying the tone and making the corresponding gesture with you
- have students remain standing and ask them to either gesture when you speak the tone or speak the tone when you gesture
- follow this routine with the three remaining tones
- spend several minutes a day practicing the “listen, say, move and learn” routine at various transition points within instruction throughout the first month of school
- vary the routine by holding up fingers representing different tone numbers and asking students to say and gesture the corresponding tone or by saying the tone and having the students gesture

1. (平 píng), even tone (palm down cutting straight through the air in front of the body in a short motion) —
2. (上 shǎng), rising tone (hand with palm down moving at a diagonal from bottom left to top right) /
3. (去 qù), departing tone (hand with palm up making an upside down arc movement from the left to right) U
4. (入 rù), checked tone (fist pulling from top to bottom on the same diagonal as the slash mark) \

integrating Chinese specific linguistic features within a balanced literacy context - word features - phonological awareness (k-1)

building phonological awareness when introducing mentor text vocabulary

mentor text vocabulary cards (please see [my.addalingua](#) for vocabulary cards per unit and week)

day 1

- announce to students that in order to understand a text, they will have to learn new vocabulary words
- designate an area of the classroom that you will entitle “vocabulary words of the week”
- use this space to hang vocabulary cards after they have been introduced
- plan to take (some/all) of these words down at the end of each week in order to make sufficient room for the following week’s vocabulary (you may wish to leave some vocabulary words posted if they will be used in various weeks and lessons)
- place designated vocabulary cards into a bin, basket, or silk bag and build student excitement about word learning by:
 - thinking aloud, saying “Hmmm...I wonder what words we’ll find in the “word box/bag, etc.” today?” (note: If one of the words describes an action such as “jump,” act as if it might be difficult to hold onto the bag because it keeps “jumping.” If one of the words describes an animal such as a “dog.” Open the bag and make a quick barking sound; quickly shut it again and repeat. Ask students to imagine what animal word they will learn that might make that sound; repeat this type of “play acting” with other words).
- pull out the first word and hold it up for the students to see
- display the card (using poster putty or by leaning it against a white board or wall) and point to each character as you say it aloud
- say the word aloud again and clap each syllable (character) as it is said
- ask the students to say the word as you point to each character
- ask the students to say the word as you clap each syllable
- ask the students how many syllables the word has and write the response on the back of the vocabulary card; show the number to all students
- emphasize the syllable character ratio (one syllable per character) by pointing to each part of the word and saying “hmmm...first syllable, second syllable, third syllable, etc...”
- say the word again and use an appropriate gesture to indicate/emphasize the tone of each syllable
- ask the students to gesture the tone of each syllable as you say the word and point to each character
- have students say and gesture the new word
- help students realize that each syllable has its own tone
- repeat this process with each new vocabulary word and then hang the cards on the “new vocabulary words of the week” area

day 2

- revisit new vocabulary words prior to entering into the activity to which they are associated
- say them aloud chorally as you point to each character and students clap the syllables
- repeat the process but have students stand and say each word while gesturing the correct tone for each syllable

mentor texts

- comprehension strategy: 推断 (inferring)
- read aloud: 月亮, 晚安 (Goodnight, Moon)
 - vocabulary cards:
 - 电话 (telephone)
 - 画 (painting)
 - 跃过 (jump over)
 - 梳子 (comb)
 - 晚安 (good night)
 - 所有的 (all of)
 - 轻轻的 (gently)
 - 跳 (jump)
- shared read: 打瞌睡的房子 (The Napping House)
 - vocabulary cards:
 - 温暖 (warm)
 - 打瞌睡 (nap)
 - 做梦 (dreaming)
 - 房子 (house)

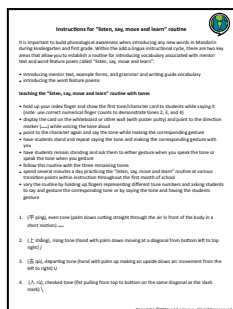

做梦

Instructions for "Tides, My House and Stars" routine

It is important to learn phonological awareness when introducing the new words. In addition, during kindergarten and first grade, writing the address along with the card, then use the key, mental strategies related to writing or thinking vocabulary associated with the letter and word before using labels "Tides, My House and Stars".

- introducing context: use, examples: forms, and grammar and writing practice vocabulary
- introducing context: use, examples: forms, and grammar and writing practice vocabulary

Teaching the "Tides, My House and Stars" routine with cards

- Hold up your index finger and show the first instruction card (tides, salt water) (1)
- Show and correct handwriting (right) (write in instruction lines 1, 2, and 3)
- Display the card to the children in your seat and each child point to the instruction (write) (2) while saying the word (tides)
- Point to the instruction (right) and the line while making the corresponding gesture
- Have children stand and repeat using the line and making the corresponding gesture with their
- Have students repeat drawing a star above or below when you open the book or sign the line when you get up
- Make the routine with the three instructions
- Repeat several times in any practice the "Tides, My House and Stars" routine at various
- Consider using mental strategies throughout. For the words in each
- Use the strategy for making a rhyme: repeating, rhyming, the words and using students to say and gesture the corresponding line or by using the line and using the students' gesture

1. (1) (right) open line (left) down writing (right) through the air in front of the body to a short word(s).
2. (2) (right) open line (down) with palm down moving at a diagonal from bottom left to top (right).
3. (3) (left) opening line (down) with palm on making an upside down M movement from the left to right (2).
4. (4) (left) (right) open line (left) pulling from top to bottom on the same diagonal as the last (right).

Instructions for "Listen, say, trace and hear" routine

It is important to build phonological awareness when introducing the new words. In addition, during kindergarten students' phonics lessons the additional non-syllable parts, then use two key phonological awareness activities in order to introduce students to the sound and meaning of the words.

Introducing the words:

- Introducing the words: "listen, say, trace and hear"

Teaching the "Listen, say, trace and hear" routine with words:

- Hold up the picture (right side) and say the word (pronounced) clearly and slowly with a long "O" sound - say "dream" (right side) and "doze" (left side) in the same way.
- Hold up the picture on the left side and say the word (pronounced) clearly and slowly with a long "O" sound - say "doze" (left side) and "dream" (right side) in the same way.
- Have students stand and repeat saying the word and tracing the corresponding picture with their hands.
- Have students repeat tracing up and down on their bodies when you say the word in the air.
- Have the students say the words.
- Repeat several times in any order of the "Listen, say, trace and hear" routine at various intervals during the lesson.
- Use the routine for tracing the words. Remember, children are learning to say and hear the corresponding word as by saying the word and tracing the picture.

1. [L] Hold up the word (right side) and say it through the air in front of the body to the right (right side).
2. [L] Hold up the word (left side) and say it through the air in front of the body to the left (left side).
3. [L] Hold up the word (right side) and say it through the air in front of the body to the right (right side).
4. [L] Hold up the word (left side) and say it through the air in front of the body to the left (left side).
