

Social Media: Return on Engagement

▶ Social Media: What's all the fuss about?

▶ Why work with us?

The Key Differences between Social Media and Traditional Media

Shift from Monologue to Conversation - Using Social Media means giving up a little control over your organization's message and trading it in for a chance to better engage and learn from your constituents

Happens in Real Time - Social Media doesn't wait for press releases or formal statements, it is about responding in real time to both positive and negative feedback.

User-generated - Fortunately you don't have to rely solely on your own staff to create content for Social Media, good engagement means that your constituents will also be producing posts, tweets, comments and status updates.

NPower focuses technology on mission in ways that advance both individual nonprofits and the sector as a whole. We are motivated by mission and inspired by possibility.
